

316 Stainless Steel Push-in Fittings

Temperature Range:
-20°C to +225°C

Maximum Working Pressure:
15 bar

The collet is made in stainless steel 316L ensures the perfect tube clamping with every kind of material without damaging the surface.

The connection between the tube and the fitting ensures a total tightness even in severe

conditions such as impact and vibrations. All of the threads from this range have been equipped with tightening parts, which allow the direct assembly of the fittings, reducing the installation time.

Food Viton o-rings as standard for all parallel threads.

All the straight adaptors, with taper or parallel threads can be assembled also with allen keys and it is possible to use them in reduced spaces.
