

Hydraulic Accumulators & Accessories

Section 1 – Hydraulics

Diaphragm Accumulators

Tech Sheet 10553

- Low cost non-repairable accumulators.
- High reliability gas sealing system, ensures no leakage.
- Electron beam welded steel shell.
- Parallel threads with bonded seal recess ensures easy connection with no leaks.
- Material: steel shell electron beam welded. Non repairable.
- Nitrile membrane for mineral oil or non aggressive fluid.

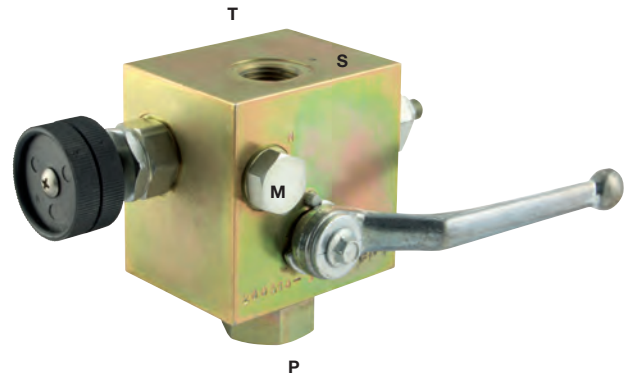

Safety Blocks

Tech Sheet 2153

Carbon Steel. All blocks fully tested. Nitrile seals as standard, viton available on request. Contact technical department. Pressure relief valve for the protection of accumulator. Manual dump to tank as standard.

Maximum Working Pressure:
360 bar
